1. Citations

2. References

1. Citations

With `citation_style: author-year`, in-text markers render as `(Author, year)` instead of numeric `[n]`.

A single citation ([Smith & Doe, 2020](#)) and a grouped one ([Brown, 2018](#); [Lee et al., 2021](#)) produce author-year markers. The **References** section is ordered alphabetically by author and lists only the cited entries.

2. References
